

WEBER BASIN WATER
CONSERVANCY DISTRICT

FREE WATER CHECK!

Want a customized irrigation schedule for your landscape? Want to know what type of soil you have and how to make your irrigation system more efficient? Get a free water check and you will learn how to efficiently water your landscape so you can have an attractive landscape and save water and money!

Free Residential Water Checks:

A water check is a series of tests on the irrigation system, performed by Weber Basin Water employees, to determine how much water the irrigation system is putting out (precipitation rate) the infiltration of water into the soil, and the distribution uniformity (evenness of the application of water). The Weber Basin Water employee also checks soil type, root depth and sprinkler pressure. The entire process takes about one hour and the homeowner is left with a customized irrigation schedule and recommendations to better the system.

Free Commercial, Industrial, and Institutional Water Check:

A Weber Basin Water employee walks through the entire irrigation system with the landscape maintenance staff. Each irrigation zone is turned on and examined for problems. Once the maintenance staff repairs the problems and tunes the system up, the Weber Basin Water employee will return to do a follow-up walk through and perform catch cup test on enough of the zones to represent the entire system. A report is provided with results, suggestions and scheduling recommendations.

The Water Check Program is a FREE service and is offered from May – August.
